

Remarks:

This amendment is submitted in an earnest effort to advance this case to issue without delay.

The specification has been amended to eliminate some minor obvious errors and cure the problems helpfully pointed out by the examiner. No new matter whatsoever has been added.

The claims have also been extensively revised to overcome the largely formal objections. In addition they have been modified to correspond more closely to the claims now in the equivalent EP case.

These claims now clearly define a system having a fixed frame 7 and two movable frames held together by three respective linkages (originally called "quadrilaterals"). Such a system is not seen in EP 0,876,870 of Zorzetto. Now that the claim language

has been cleaned up, it is clear that we have a different structure here. Thus the \$102 and \$103 rejections must fall.

Respectfully submitted,  
K.F. Ross P.C.
